**Historicizing Canadian Anthropology** Julia Harrison 2011-11-01 Historicizing Canadian

Anthropology is the first significant examination of the historical development of anthropological study in this country. It addresses key issues in the evolution of the discipline: the shaping influence of Aboriginal-anthropological encounters; the challenge of compiling a history for the Canadian context; and the place of international and institutional relations. The contributors to this collection reflect on the definition and scope of the discipline and explore the degree to which a uniquely Canadian tradition affects anthropological theory, practice, and reflexivity.

2002-01-04 Anthropology and Archaeology provides a valuable and much-needed introduction to the theories and methods of these two inter-related subjects. This volume covers the historical relationship and contemporary interests of archaeology and anthropology. It takes a broad historical approach, setting the early history of the disciplines with the colonial period during which the Europeans encountered and attempted to make sense of many other peoples. It shows how the subjects are linked through their interest in kinship, economics and symbolism, and discusses what each contribute to debates about gender, material culture and globalism in the post-colonial world.

**The Present Past** Ian Hodder 2012-11-05 This updated edition of Professor Ian Hodders original

and classic work on the role which anthropology must play in the interpretation of the archaeological record. There has long been a need for archaeologists and anthropologists to correlate their ideas and methods for interpreting the material culture of past civilisations.

Archaeological interpretation of the past is inevitably based on the ideas and experiences of the present and the use of such ethnographic analogy has been widely adapted and criticised, not least in Britain. In this challenging study, Ian Hodder questions the assumptions, values and methods which have been too readily accepted. At the same time, he shows how anthropology can be applied to archaeology. He examines the criteria for the proper use of analogy and, in particular, emphasises the need to consider the meaning and interpretation of material cultures within the total social and cultural contexts. He discusses anthropological models of refuse deposits, technology and production, subsistence, settlement, burial, trade exchange,

art form and ritual; he then considers their application to comparable archaeological data. Throughout, Professor Hodder emphasises the need for a truly scientific approach and a critical self-awareness by archaeologists, who should be prepared to study their own social and cultural context, not least their own attitudes to the present-day material world.

Writing Anthropology Carole McGranahan 2020-04-24 In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more

than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one’s writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. **Death, Mourning, and Burial** Antonius C. G. M. Robben 2009-02-04 In *Death, Mourning, and Burial*, an indispensable introduction to the anthropology of death, readers will find a rich selection of some of the finest ethnographic work on this fascinating topic. Comprised of six sections that mirror the social trajectory of death: conceptualizations of death; death and dying; uncommon death; grief and mourning; mortuary rituals; and remembrance and regeneration

Includes canonical readings as well as recent studies on topics such as organ donation and cannibalism Designed for anyone concerned with issues of death and dying, as well as: violence, terrorism, war, state terror, organ theft, and mortuary rituals Serves as a text for anthropology classes, as well as providing a genuinely cross-cultural perspective to all those studying death and dying

Anthropology and Law Mark Goodale 2017-05-02 An introduction to the anthropology of law that explores the connections between law, politics, and technology From legal responsibility for genocide to rectifying past injuries to indigenous people, the anthropology of law addresses some of the crucial ethical issues of our day. Over the past twenty-five years, anthropologists have studied how new forms of law have reshaped important questions of citizenship, biotechnology, and rights movements, among many others. Meanwhile, the rise of international law and transitional justice has posed new ethical

and intellectual challenges to anthropologists. Anthropology and Law provides a comprehensive overview of the anthropology of law in the post-Cold War era. Mark Goodale introduces the central problems of the field and builds on the legacy of its intellectual history, while a foreword by Sally Engle Merry highlights the challenges of using the law to seek justice on an international scale. The book's chapters cover a range of intersecting areas including language and law, history, regulation, indigenous rights, and gender. For a complete understanding of the consequential ways in which anthropologists have studied, interacted with, and critiqued, the ways and means of law, Anthropology and Law is required reading.

This invasion of the world by what Marc Augé calls "non-space" results in a profound alteration of awareness: something we perceive, but only in a partial and incoherent manner. Augé uses the concept of "supermodernity" to describe a situation of excessive information and excessive space. In this fascinating essay he seeks to establish an intellectual armature for an anthropology of supermodernity.

[Introduction to Ethnographic Research](#) Kimberly Kirner 2019-09-05 Introduction to Ethnographic Research streamlines learning the process of research, speaks to the student at a foundational level, and helps the reader conquer the apprehensions of mastering research methods. Written in a conversational style, authors Kimberly Kirner and Jan Mills use a focus on scaffolding across the chapters to help the student transition from step to step in the research process. Case studies and first-hand accounts are also featured in each chapter, allowing the student to see the early steps, successes and at times failures that accomplished researchers experienced in their past. These real examples further encourage the student that even the best researchers failed along the way, and more importantly, learned from those mistakes. This text is designed to be used as a stand alone book, but is enhanced by the use with the supplemental workbook, Doing

Ethnographic Research by the same authors. This text has call-outs to the supplemental text, which allow for application and practice of the material learned. **INSTRUCTORS!** Doing Ethnographic Research: Activities and Exercises by Kimberly Kirner and Jan Mills is \$5 when you bundle with the core text, Introduction to Ethnographic Research: A Guide for Anthropology. **Social Science Quotations** David L. Sills 2000 The use of quotations in scientific writings often fails to capture the force of formulations that made the quotations memorable. In this reference work, the date and source of each quotation serve to help place them in their larger contexts, making it useful in examining the discipline's history.

**Cahuachi in the Ancient Nasca World** Helaine Silverman Ever since its scientific discovery, the great Nasca site of Cahuachi on the south coast of the Central Andes has captured the attention of archaeologists, art historians, and the general

public. Until Helaine Silverman's fieldwork, however, ancient Nasca culture was seen as an archaeological construct devoid of societal context. Silverman's long-term, multistage research as published in this volume reconstructs Nasca society and contextualizes the traces of this brilliant civilization (ca. 200 B.C.-A.D. 600). Silverman shows that Cahuachi was much larger and more complex than portrayed in the current literature but that, surprisingly, it was not a densely populated city. Rather, Cahuachi was a grand ceremonial center whose population, size, density, and composition changed to accommodate a ritual and political calendar. Silverman meticulously presents and interprets an abundance of current data on the physical complexities, burials, and artifacts of this prominent site; in addition, she synthesizes the history of previous fieldwork at Cahuachi and introduces a corrected map and a new chronological chart for the Rio Grande de Nazca drainage system. On the basis of empirical field

data, ethnographic analogy, and settlement pattern analysis, Silverman constructs an Andean model of Nasca culture that is crucial to understanding the development of complex society in the Central Andes. Written in a clear and concise style and generously illustrated, this first synthesis of the published data about the ancient Nasca world will appeal to all archaeologists, art historians, urban anthropologists, and historians of ancient civilizations.

*Other People's Anthropologies* Aleksandar Bošković 2008-03-30 Anthropological practice has been dominated by the so-called "great"

traditions (Anglo-American, French, and German). However, processes of decolonization, along with critical interrogation of these dominant narratives, have led to greater visibility of what used to be seen as peripheral scholarship. With contributions from leading anthropologists and social scientists from different countries and anthropological traditions, this volume gives voice to scholars outside these "great" traditions. It shows the immense variety of methodologies, training, and approaches that scholars from these regions bring to anthropology and the social sciences in general, thus enriching the disciplines in important ways at an age marked by multiculturalism, globalization, and transnationalism.

*Applied Anthropology* Sheena Nahm 2015-10-16

This collection brings together recent innovative work in applied and practicing anthropology. Organised around the theme of unexpectedness, it examines some of the novel spaces, topics, and methods that anthropologists are involved with. The volume emphasises non-traditional settings and demonstrates the important role of anthropology in addressing some of the pressing issues facing society today. The contributors offer detailed ethnographic examples from their own research and work that give students valuable insight and advice. Drawn mainly from the United States, the case studies illustrate the diverse arenas in which anthropologists operate, from law and finance to education and health care. Simultaneous consideration is given to practical applications, theoretical reflections, and professional experiences.

*Conceptualizing Iranian Anthropology* Shahnaz R. Nadjmabadi 2010-01-01 During recent years, attempts have been made to move beyond the Eurocentric perspective that characterized the social sciences, especially anthropology, for over 150 years. A debate on the “anthropology of anthropology” was needed, one that would consider other forms of knowledge, modalities of writing, and political and intellectual practices. This volume undertakes that challenge: it is the result of discussions held at the first organized encounter between Iranian, American, and European anthropologists since the Iranian Revolution of 1979. It is considered an important first step in overcoming the dichotomy between “peripheral anthropologies” versus “central anthropologies.” The contributors examine, from a critical perspective, the historical, cultural, and political field in which anthropological research emerged in Iran at the beginning of the twentieth

century and in which it continues to develop today.
