*Parentology* Dalton Conley 2014-03-18 An award-winning

scientist offers his unorthodox approach to

childrearing: "Parentology is brilliant, jaw-droppingly

funny, and full of wisdom...bound to change your thinking

about parenting and its conventions" (Amy Chua, author

of *Battle Hymn of the Tiger Mother*). If you're like many

parents, you might ask family and friends for advice

when faced with important choices about how to raise

your kids. You might turn to parenting books or simply

rely on timeworn religious or cultural traditions. But

when Dalton Conley, a dual-doctorate scientist and full-

blown nerd, needed childrearing advice, he turned to

scientific research to make the big decisions. In

*Parentology*, Conley hilariously reports the results of

those experiments, from bribing his kids to do math

(since studies show conditional cash transfers improved

educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
