Avenir de la Démocratie en Europe Philippe C. Schmitter 2004-01-01 This publication examines a number of challenges and opportunities for democracy and democratic institutions throughout Europe, and makes 28 recommendations for reforms intended to improve government efficiency, transparency and accountability. Topics discussed include the impact of forces such as globalisation, European integration, migration and technological change; as well as issues such as citizenship (political discontent, cultural identity and protest), representation (political parties and civil society) and decision-making.

**The Servile Mind** Kenneth Minogue 2012-11-20 One of the grim comedies of the twentieth century was that miserable victims of communist regimes would climb walls, swim rivers, dodge bullets, and find other desperate ways to achieve liberty in the West at the same time that progressive intellectuals would sentimentally proclaim that these very regimes were the wave of the future. A similar tragicomedy is playing out in our century: as the victims of despotism and backwardness from Third World nations pour into Western states, academics and intellectuals present Western life as a nightmare of inequality

and oppression. In *The Servile Mind: How Democracy Erodes the Moral Life*, Kenneth Minogue explores the intelligentsia's love affair with social perfection and reveals how that idealistic dream is destroying exactly what has made the inventive Western world irresistible to the peoples of foreign lands. *The Servile Mind* looks at how Western morality has evolved into mere "politico-moral" posturing about admired ethical causes—from solving world poverty and creating peace to curing climate change. Today, merely making the correct noises and parading one's essential decency by having the correct opinions has become a substitute for individual moral responsibility. Instead, Minogue argues, we ask that our governments carry the burden of solving our social—and especially moral—problems for us. The irony is that the more we allow the state to determine our moral order, the more we need to be told how to behave and what to think. Such is the servile mind.

**Outcry** Marie Spike 2005 *American Voices of Conscience, Post-9/11* is an anthology of letters, op-eds, speeches and short essays drawn from a broad spectrum of Americans, which eloquently expresses their outrage, betrayal and frustration over the corrupt and misguided actions and policies of the Bush/Cheney administration since the tragedies of 9/11. Within its pages, you'll find stirring monologues, passionate rants, laser-guided satire, and proposals for sane, nonviolent solutions to our problems. From soldiers to seniors, from Zen monks to Christian ministers,

from librarians to libertarians, these are the true patriots - those who really care what is happening to our society and have had the courage to speak out against dishonesty and deception in our cherished institutions. With the publication of *Outcry: American Voices of Conscience, Post-9/11*, we hope to weave these myriad voices into a chorus of reason and compassion. For they are the voices of conscience, unintimidated by the dissonance of militarism, corporate greed, and the blind, uncritical acceptance of flag-waving propaganda.

[Honeybee Democracy](#) Thomas D. Seeley 2010-09-20 Honeybees make decisions collectively--and democratically. Every year, faced with the life-or-death problem of choosing and traveling to a new home, honeybees stake everything on a process that includes collective fact-finding, vigorous debate, and consensus building. In fact, as world-renowned animal behaviorist Thomas Seeley reveals, these incredible insects have much to teach us when it comes to collective wisdom and effective decision making. A remarkable and richly illustrated account of scientific discovery, *Honeybee Democracy* brings together, for the first time, decades of Seeley's pioneering research to tell the amazing story of house hunting and democratic debate among the honeybees. In the late spring and early summer, as a bee colony becomes overcrowded, a third of the hive stays behind and rears a new queen, while a swarm of thousands departs with the old queen to produce a daughter colony. Seeley describes how these bees evaluate potential nest sites, advertise their discoveries to one another, engage in open deliberation, choose a final site, and navigate together--as a swirling cloud of bees--to their new home. Seeley investigates how evolution has honed the decision-making methods of honeybees over millions of years, and he considers similarities between the ways that bee swarms and primate brains process information. He concludes that what works well for bees can also work well for people: any decision-making group should consist of individuals with shared interests and mutual respect, a leader's influence should be minimized, debate should be relied upon, diverse solutions should be sought, and the majority should be counted on for a dependable

resolution. An impressive exploration of animal behavior, *Honeybee Democracy* shows that decision-making groups, whether honeybee or human, can be smarter than even the smartest individuals in them.

*On War and Democracy* Christopher Kutz 2020-04-28 *On War and Democracy* provides a richly nuanced examination of the moral justifications democracies often invoke to wage war. In this compelling and provocative book, Christopher Kutz argues that democratic principles can be both fertile and toxic ground for the project of limiting war's violence. Only by learning to view war as limited by our democratic values—rather than as a tool for promoting them—can we hope to arrest the slide toward the borderless, seemingly endless democratic "holy wars" and campaigns of remote killings we are witnessing today, and to stop permanently the use of torture and secret law. Kutz shows how our democratic values, understood incautiously and incorrectly, can actually undermine the goal of limiting war. He helps us better understand why we are tempted to believe that collective violence in the name of politics can be legitimate when individual violence is not. In doing so, he offers a bold new account of democratic agency that acknowledges the need for national defense and the promotion of liberty abroad while limiting the temptations of military intervention. Kutz demonstrates why we must address concerns about the means of waging war—including remote war and surveillance—and why we must create institutions to safeguard some nondemocratic values, such as dignity and martial honor, from the threat of democratic politics. *On War and Democracy* reveals why understanding democracy in terms of political agency, not institutional process, is crucial to limiting when and how democracies use violence.

Graduate Faculties 1972 *The Age of The Strongman* Gideon Rachman 2022-04-07 'Essential and definitive' - CATHERINE BELTON, author of PUTIN'S PEOPLE We are in a new era. Since the beginning of the millennium, when Vladimir Putin took power in Russia, authoritarian leaders have come to dominate global politics. Self-styled strongmen have risen to power in Moscow, Beijing, Delhi, Brasilia, Budapest, Ankara, Riyadh and Washington. How and why did this new style of strongman leadership arrive? How likely is it to lead to war or economic collapse? And what forces are in place not only to keep these strongmen in check but to reverse the trend? Everywhere they go, these leaders encourage a cult of personality. They are nationalists and social conservatives, with little tolerance for minorities, dissent or the interests of foreigners. At home, they claim to stand up for ordinary people against globalist elites; abroad, they posture as the embodiments of their nations. And they are not just operating in authoritarian political systems but have begun to emerge in the heartlands of liberal democracy. From Putin, Trump and Bolsonaro to Erdogan, Xi and Modi, *The Age of the Strongman* provides the first truly global treatment of the new nationalism and offers a bold new paradigm for understanding our world. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.

Taxing the Rich Kenneth Scheve 2017-11-07 In today's social climate of acknowledged and growing inequality, why are there not greater efforts to tax the rich? In this wide-ranging and provocative book, Kenneth Scheve and David Stasavage ask when and why countries tax their wealthiest citizens—and their answers may surprise you. *Taxing the Rich* draws on unparalleled evidence from twenty countries over the last two centuries to provide the broadest and most in-depth history of progressive taxation available. Scheve and Stasavage explore the intellectual and political debates surrounding the taxation of the wealthy while also providing the most detailed examination to date of when taxes have been levied against the rich and when they haven't. Fairness in debates about taxing the rich has depended on different views of what it means to treat people as equals and whether taxing the rich advances or undermines this norm. Scheve and Stasavage argue that governments don't tax the rich just because inequality is high or rising—they do it when people believe that such taxes compensate for the state unfairly privileging the wealthy. Progressive taxation saw its heyday in the twentieth century, when compensatory arguments for taxing the rich focused on unequal sacrifice in mass warfare. Today, as technology gives rise to wars of more limited mobilization, such arguments are no longer persuasive. *Taxing the Rich* shows how the future of tax reform will depend on whether political and economic conditions allow for new compensatory arguments to be made.

**Democracy's Arsenal** Jacques S. Gansler 2013-08-16 An expert explains why the security needs of the twenty-first century require a transformation of the defense industry of the twentieth century. New geopolitical realities—including terrorism, pandemics, rogue nuclear states, resource conflicts, insurgencies, mass migration, economic collapse, and cyber attacks—have created a dramatically different national-security environment for America. Twentieth-century defense strategies, technologies, and industrial practices will not meet the security requirements of a post-9/11 world. In *Democracy's Arsenal*, Jacques Gansler describes the transformations needed in government and industry to achieve a new, more effective system of national defense. Drawing on his decades of experience in industry, government, and academia, Gansler argues that the old model of ever-increasing defense expenditures on largely outmoded weapons systems must be replaced by a strategy that combines a healthy economy, effective international relations, and a strong (but affordable) national security posture. The defense industry must remake itself to become responsive and relevant to the needs of twenty-first-century security.

**The Decentralization of Forest Governance** Moira Moeliono 2012-05-31 'This book provides an excellent overview of more than a decade of transformation in a forest landscape where the interests of local people, extractive industries and globally important biodiversity are in conflict. The studies assembled here teach us that plans and strategies are fine but, in the real world of the forest frontier, conservation must be based upon negotiation, social learning and an ability to muddle through.' control is an ongoing global trend that deeply affects all aspects of forest management, conservation of biodiversity, control over resources, wealth distribution and livelihoods. This powerful new book from leading experts provides an in-depth account of how trends towards increased local governance are shifting control over natural resource management from the state to local societies, and the implications of this control for social justice and the environment. The book is based on ten years of work by a team of researchers in Malinau, Indonesian Borneo, one of the world's richest forest areas. The first part of the book sets the larger context of decentralization's impact on power struggles between the state and society. The authors then cover in detail how the devolution process has occurred in Malinau, the policy context, struggles and conflicts and how Malinau has organized itself. The third part of the book looks at the broader issues of property relations, conflict, local governance and political participation associated with decentralization in Malinau. Importantly, it draws out the salient points for other international contexts including the important determination that 'local political alliances', especially among ethnic minorities, are taking on greater prominence and creating new opportunities to influence forest policy in the world's richest forests from the ground up. This is top-level research for academics and professionals working on forestry, natural resource management, policy and resource economics worldwide. Published with CIFOR

**Making Futures** Pelle Ehn 2014-11-07

Innovation and design need not be about the search for a killer app. Innovation and design can start in people's everyday activities. They can encompass local services, cultural production, arenas for public discourse, or technological platforms. The approach is participatory, collaborative, and engaging, with users and consumers acting as producers and creators. It is concerned less with making new things than with making a socially sustainable future. This book describes experiments in innovation, design, and democracy, undertaken largely by grassroots organizations, non-governmental organizations, and multi-ethnic working-class neighborhoods. These stories challenge the dominant perception of what constitutes successful innovations. They

recount efforts at social innovation, opening the production process, challenging the creative class, and expanding the public sphere. The wide range of cases considered include a collective of immigrant women who perform collaborative services, the development of an open-hardware movement, grassroots journalism, and hip-hop performances on city buses. They point to the possibility of democratized innovation that goes beyond solo entrepreneurship and crowdsourcing in the service of corporations to include multiple futures imagined and made locally by often-marginalized publics. **Right, Wrong and Science** Evandro Agazzi 2004 Solving the problem of the negative impact of science and technology on society and the environment is indeed the greatest challenge of our time. To date, this challenge has been taken up by few professional philosophers of science, making this volume a welcome contribution to the general debate. Agazzi's treatment involves viewing modern science and technology as each constituting systems. Against the background of this approach, he provides a penetrating analysis of science, technology and ethics, and their interrelations. Agazzi sees the solution to the problem as lying in the moral sphere and including a multilateral assumption of responsibility on the part of decision makers both within and outside of science.

**Fundamentals of Semiconductor Lasers**

Takahiro Numai 2004-01-08 The detailed and comprehensive presentation is unique in that it encourages the reader to consider different semiconductor lasers from different angles. Emphasis is placed on recognizing common concepts such operating principles and structure, and solving problems based on individual situations. The treatment is enhanced by an historical account of advances in semiconductor lasers over the years, discussing both those ideas that have persisted over the years and those that have faded out.

Central to this book is the notion that democratic citizenship education ought to be deliberative, compassionate and friendly in order that teachers and students (learners) may respect one another and take risks in and through their pedagogical encounters. In this way, hopefully, students and teachers may become more critical, explorative and engaging. - Yusef Waghid

This text provides an in-depth analysis of the politics and organization of Muslim autocracies, radical Islamist movements, and democracies, explaining their influence on the never-ending conflicts in the Middle East. • Bibliography contains numerous Arab and Muslim-authored works rarely cited in the West, but are highly influential on Arab political thought and Islamic social mobilization • Provides a glossary of dozens of critical Islamic concepts like Ijtihad, Ulema, Awqaf, Zakat, Taqfir, and Hudna that are key to understanding Middle Eastern sociopolitical and diplomatic discourse • An index of concepts, persons, locations, and events allows quick access to information by grouping similar concepts or directing the reader to related terms

**The Third Wave** Samuel P. Huntington

2012-09-06 Between 1974 and 1990 more than thirty countries in southern Europe, Latin America, East Asia, and Eastern Europe shifted from authoritarian to democratic systems of government. This global democratic revolution is probably the most important political trend in the late twentieth century. In *The Third Wave*, Samuel P. Huntington analyzes the causes and nature of these democratic transitions, evaluates the prospects for stability of the new democracies, and explores the possibility of more countries becoming democratic. The recent transitions, he argues, are the third major wave

of democratization in the modern world. Each of the two previous waves was followed by a reverse wave in which some countries shifted back to authoritarian government. Using concrete examples, empirical evidence, and insightful analysis, Huntington provides neither a theory nor a history of the third wave, but an explanation of why and how it occurred. Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes; economic and social development; the changed role of the Catholic Church; the impact of the United States, the European Community, and the Soviet Union; and the "snowballing" phenomenon: change in one country stimulating change in others. Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred. Compromise was key to all democratizations, and elections and nonviolent tactics also were central. New democracies must deal with the "torturer problem" and the "praetorian problem" and attempt to develop democratic values and processes. Disillusionment with democracy, Huntington argues, is necessary to consolidating democracy. He concludes the book with an analysis of the political, economic, and cultural factors that will decide whether or not the third wave continues. Several "Guidelines for Democratizers" offer specific, practical suggestions for initiating and carrying out reform. Huntington's emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process. At this volatile time in history, Huntington's assessment of the processes of democratization is indispensable to understanding the future of democracy in the world.

*The Rise and Fall of Communism* Archie Brown 2010-08-17 Winner of the 2010 W.J.M. Mackenzie Prize for Best Political Science Book of the Year 2010 The relentless rise of Communism was the most momentous political development of the first half of the twentieth century. No political change has been more fundamental than its demise in Europe and its decline elsewhere. In this hugely acclaimed book Archie Brown provides an indispensable history that examines the origins of the ideology, its development in different countries, its collapse in many states following the Soviet perestroika, and its current incarnations around the globe. *The Rise and Fall of Communism* explains how and why Communists came to power; how they were able, in a variety of countries on different continents to hold on to power for so long; and what brought about the downfall of so many Communist systems. A groundbreaking work from an internationally renowned specialist, this is the definitive study of the most remarkable political and human story of our times.

**Powerful and Brutal Weapons** Stephen P Randolph 2009-06-30 As America confronts an unpredictable war in Iraq, Randolph returns to an earlier conflict that severely tested our civilian and military leaders. Randolph's intimate chronicle of the commander-in-chief gains us unprecedented access to how these strategic assessments were made and played out.

**Blowout** Rachel Maddow 2020-02-06 **\*\*THE NEW YORK TIMES BESTSELLER\*\*** A ground-breaking investigation into the oil and gas industry, international corruption and world politics. Oil. Corrupt? Yes. Unimaginably lucrative? Of course. But, the enemy of democracy? *Blowout* is the oil and gas industry as we've never seen it before, as told by America's most incisive political journalist, Rachel Maddow. A blackly comic journey from Washington to Siberia, to deep within the earth's crust and the icy Arctic seas, it reveals not just the greed and incompetence of Big Oil and Gas but why the Russian government hacked the 2016 U.S. election. This is our final wake-up call: to stop subsidizing oil and gas, to fight for transparency, and to check the influence of the world's most destructive industry before it destroys our democracy 'Each page in *Blowout* is a revelation into the depth of corruption and greed that is infused into the international economy' David Lammy, MP

**Jihad Vs McWorld** Benjamin R Barber 2010-12-15 **JIHAD VS. MCWORLD** is an essential text for anyone who wants to understand the challenges facing us after the tragic events of September 11, 2001 and in light of the current conflict in the Middle East. In a groundbreaking work, political scientist Benjamin R. Barber offers a penetrating analysis of the central conflict of our times: consumerist capitalism versus religious and tribal fundamentalism. These diametrically opposed but intertwined forces are tearing apart - and bringing together - the world as we know it, undermining democracy and the nation-state on which it depends. On the one hand, capitalism on the global level is rapidly dissolving the social and economic barriers between nations, transforming the world's diverse populations into a blandly uniform market. On the other hand, ethnic, religious, and racial hatreds are fragmenting the political landscape into smaller and smaller tribal units.

JIHAD VS. MCWORLD is the term that Barber has coined to describe the powerful and paradoxical interdependence of these forces. In this important book, now more timely than ever before, he explores the alarming repercussions of this potent dialectic and in his new introduction sketches a democratic response to terrorism.

**The Magic Bullet?** Tim Benbow 2004-06-30 Bombing by use of laser-guided weaponry is evolution, not revolution - aircraft have been bombing for more than 85 years, but a network of sensors in space or on the sea-bed that can track every move, without human involvement, may be revolution. This, and other technical advances, may enable intervention and prevention without conflict, certainly with non-lethal weaponry. The future structure of armed forces, the nature and size of defence industries, the potential risk of there being a single superpower, and many other matters, depend on how much the present and future change in military affairs is evolution and how much is genuine revolution. This study, based on report papers prepared for the Ministry of Defence and praised for their clarity, offers clear analysis of the debate for lay students of current and military affairs as well as professionals working in the fields of politics, science, security and military strategy and planning.

*The Public Service Media and Public Service Internet Manifesto* Christian Fuchs 2021-09-07 This book presents the collectively authored Public Service Media and Public Service Internet Manifesto and accompanying materials. The Internet and the media landscape are broken. The dominant commercial Internet platforms endanger democracy. They have created a communications landscape overwhelmed by surveillance, advertising, fake news, hate speech, conspiracy theories, and algorithmic politics. Commercial Internet platforms have harmed citizens, users, everyday life, and society. Democracy and digital democracy require Public Service Media. A democracy-enhancing Internet requires Public Service Media becoming Public Service Internet platforms - an Internet of the public, by the public, and for the public; an Internet that advances instead of threatens democracy and the public sphere. The Public Service Internet is based on Internet platforms operated by a variety of Public Service Media,

taking the public service remit into the digital age. The Public Service Internet provides opportunities for public debate, participation, and the advancement of social cohesion.

Accompanying the Manifesto are materials that informed its creation: Christian Fuchs' report of the results of the Public Service Media/Internet Survey, the written version of Graham Murdock's online talk on public service media today, and a summary of an ecomitee.com discussion of the Manifesto's foundations.

**Rain** Barney Campbell 2015-07-30 ONE OF THE EVENING STANDARD'S BOOKS OF THE YEAR 2015 Barney Campbell's Rain is a searingly powerful debut that reads like a British Matterhorn \*\*\*\*\* 'A wonderfully achieved, enthralling and moving novel of war. Its authenticity is as telling as it is terrifying' William Boyd 'No better on-the-ground description of Britain's war will ever be written. Rain is what Chickenhawk or, more recently, Matterhorn was to Vietnam. It's unputdownable, except for when the reader needs to draw breath or battle a lump in the throat' Evening Standard Corporal Thomas (my acting sergeant since Adams died) and I have to go down the line of the boys as they're checking their kit before we go out. Some of them are crying, not bawling just weeping gently but still steadfast; others are just pumped to the max, bouncing their heads up and down like they're listening to trance music, just amped about getting the rounds down. Those are the ones I'm most worried about; how they're going to cope with being back home is beyond me. Tom Chamberlain was destined to be a soldier from the moment he discovered a faded picture of his

father patrolling the streets of Belfast. With the war in Afghanistan at its savage peak, Tom is despatched from home in the dead of an anonymous September night, a blood tribute leaving without fanfare. Full of eagerness, but wracked by self-doubt, he must discover who he is and what he is capable of. But as the bonds with his comrades grow, home - and the loved ones left behind - seem ever more remote from the surreal violence and exhilaration of war. Drawing on the author's own experience, Rain is the most powerful, vivid and affecting portrait of the Afghan frontline to have yet emerged - a novel of war that will take its place among the classics from previous generations. 'Rain is not merely good, it's remarkable. Powerful, at times unbearably harrowing, it captures both the fear and exhilaration of men pushed to breaking point' Jeremy Paxman 'Gripping . . . the ending is genuinely shocking' Daily Mail 'A powerful and

moving story of war with all the authenticity of a memoir' Charles Cumming 'One of the most powerful and emotional works ever written about British soldiers in battle. Troubling, funny, upsetting, exhilarating and deeply moving. You will never forget it' Colonel Richard Kemp 'Thrilling, gut-wrenching and profoundly moving, this book, like all the very best novels of war, has the utterly compelling grip of authenticity' James Holland 'An extraordinary book: authentic, beautifully written and very moving' Saul David 'Simply superb. It could become the defining account of the British in Afghanistan' Tom Petch, writer and director of 'The Patrol' 'One of the best novels about the Afghanistan war. Brutally honest, it could have been a memoir' David Axe 'A must-read debut' Tom Newton-Dunn
