**One-Sheet-A-Day Math Drills** Neki C. Modi This One-Sheet-A-Day math drill workbook is for 4th grade students who want extra practice with two digit multiplication. It contains 200 math practice sheets, one for each school day of the year. Upon completion, the student will be more competent in 4th grade mathematics and ready to proceed with more difficult exercises. Unlike other math drill books, this is one of 24 workbooks created to establish a daily routine for each student to practice on their own from grades 1 through 7. It is specifically designed to gradually increase mathematic ability with the least amount of stress for both parent and student. Kids need to practice at home to support what they are learning in school, but finding resources to help with that goal can be daunting. It takes a lot of time searching online for free resources to print or for books with enough exercises. Beyond that, the options include going to libraries, enrolling them in an afterschool class or hiring a personal tutor. Who has the time and money for all of that? The answer is, not many parents. Each and every parent wants to provide enough practice work to their kids, but on top of the challenges in finding resources, questions remain about how much practice a child needs to boost educational success: twenty sheets of

practice work a day? One sheet a week? What's the optimum practice work during a whole academic year? Confused? The authors have a decade of classroom expertise and have spent a large amount of time researching and wasting resources trying all the options for their own kids. Now you can benefit from what they have learnt. The result is finding out that "ONE-SHEET-A-DAY" is the optimum way to support classroom learning, and it is amazingly simple. This book eliminates the need to take home prints or run around franchises, bookstores and libraries trying to find enough material. It also prevents you from overwhelming your kids with too many math drill worksheets. There are approximately 200 school days a year. Simply have your child complete ONE per day. Work is far easier when it is part of a routine, especially for kids. The One-Sheet-per-Day program is an easy routine to start and maintain because it takes less than 20 minutes per day, using basic skills your child already knows. Simply take one sheet from the book, ask your child to complete it in a quiet place, and return it to you to check the answers, a painless routine for you and your child, and instant feedback for both of you. Geared to follow most math curriculums, most kids can do the appropriate sheet on their own based on what they are learning at school. "One-Sheet-A-Day" math practice drills will give your child practice they need to score higher on test day, and build confidence in their math abilities.

The Internet is an open door to the biggest library/laboratory the world has ever seen—and it's all at your fingertips for free! This never-ending source of information, adventure, and educational experiences for the entire family is now compiled in a complete curriculum for any age in *Homeschool Your Child for Free*. This invaluable guide to all the best in free educational material—from reading-readiness activities for preschoolers to science projects for teens—categorizes, reviews, and rates more than 1,200 of the most useful educational resources on the Internet and beyond. You'll discover:

- Legal guidelines and compliance requirements for home educators
  - Complete curriculum plans for a comprehensive education, for preschool through high school
  - Online lesson plans arranged by subject, from American history to zoology
  - Teaching tips and motivators from successful homeschoolers
  - And much, much more!
- "Wow! Everything I have been trying to organize—all in one book! This is going to be part of my resource library for the support group I lead. Thanks, ladies."—Kimberly Eckles, HIS Support Group Leader, Home Instructors I'm impressed! There are more sites and links than I knew existed. A great resource for homeschoolers."—Maureen McCaffrey, publisher Homeschooling Today

Just Stop and Think! Fiona Wallace 2007-10-03 Includes CD-Rom 'This newly updated resource

book with printable activities (on an accompanying CD-Rom) provides excellent teaching materials for busy teachers and teaching assistants. It is likely to be most useful when linked to professional development activities designed to address behaviour issues at the whole-school level' - SENCO Update '[This book] offers a resource to schools that can be incorporated into differentiated classroom planning, as well as IBPs, IEPs or pastoral guidance for a particular child...[The book offers] a comprehensive means of helping those children who struggle with their behaviour to learn to take responsibility for their actions and to improve' - Special Children who struggle with their behaviour, just like those who struggle with an academic task such as learning to read or doing mathematical calculations, need extra, structured, support. This resource helps educational staff to teach young people to improve their behaviour without resorting to punishment or to strategies based on lost learning opportunities. The ready-to-use worksheets encourage pupils to:

- understand their own behaviour
- see others point of view
- think about how the future might look
- consider the range of choices to action
- be aware of potential help and pitfalls
- plan a course of action
- check and review their progress.

These will help children to take responsibility for their actions - both those that get them in trouble and those that they can take to change their behaviour for the better. For this new edition, the author has revised and expanded the whole book, and added 16 brand new worksheets. It is ideal for anyone working with pupils experiencing difficulty in school and can be used in group or individual work settings.

*Communicating with Children and Young People* Michelle Lefevre 2010 "This is one of the best texts on this subject to emerge in recent years ù well written, scholarly with practice accounts that draw on Michelle Lefevre's direct experience. An essential text for all practitioners who encounter children and young people in their work."-Pam Trevithick, University of Bristol "This highly readable book makes a valuable contribution to an important but undeveloped area of practice. It combines theoretical perspectives on the dynamics of communication with children with opportunities for application, reflection and evaluation of one's own practice."-Karen Tanner, Senior Clinical Lecturer in Social Work, Tavistock Clinic Direct practice with children and young people has moved to centre stage in policy and practice within Children' Services. It is now recognised that if practitioners are to make a real difference to children and young people's lives, they must be able to engage, relate to, and communicate with children and young people themselves. Written by an experienced practitioner and educator, this timely textbook equips student social workers and other practitioners wishing to update their learning with the knowledge and capabilities needed for effective practice. Key skills, such as how to form relationships, understand non-verbal communication, break bad news and communicate within family groupings, are explored within the context of professional roles and tasks such as assessment, involving young people in decision-making and planning, and work with children in care. The book uses a

problem-based learning; approach underpinned by theoretical frameworks, research findings and the voices of children and young people. Practice vignettes encourage readers to consider how these skills can be used within a range of practice contexts, tailoring communication to children and young people's specific needs and experiences.

**Holes** Louis Sachar 2020-11-05 Stanley Yelnat's family has a history of bad luck going back generations, so he is not too surprised when a miscarriage of justice sends him to Camp Green Lake Juvenile Detention Centre. Nor is he very surprised when he is told that his daily labour at the camp is to dig a hole, five foot wide by five foot deep, and report anything that he finds in that hole. The warden claims that it is character building, but this is a lie and Stanley must dig up the truth. In this wonderfully inventive, compelling novel that is both serious and funny, Louis Sachar has created a masterpiece that will leave all readers amazed and delighted by the author's narrative flair and brilliantly handled plot.

**Spacing Out Activity Guide** Stephanie McCumbee 2015-02-01 Lessons for Common Core and Social Skill Development "Pay attention!" If your students' minds are wandering, teach them skills to stay focused and reach goals. More than 20 classroom-friendly lessons include behavior management tools that teach kids how to complete tasks successfully and on time. The activities in this book support Common Core and Academic literacy standards and are designed to accompany the Spacing Out! picture book. Using the story as a stimulus, students will explore making predictions, comparing characters, cause and effect, sequencing, and making story maps. Discussion questions relating to the story help students develop critical thinking skills and determine the positive outcomes for completing tasks, and the negative consequences of becoming distracted.

Additional activities reinforce social skill development for setting goals, identifying things to work on, coping with distractions, and celebrating success. The activities are appropriate for K-5 classroom and can be used with individuals, small groups, or large groups. Educators will appreciate the easy-to-use activities, with step-by-step instructions, lists of materials, worksheets, and answer keys. The CD includes ready-to-print worksheets, handouts, and reward coupons.

curriculum that is grounded in the concept of developmentally appropriate education. This text is designed to meet the very specific professional development needs of future teachers of mathematics in middle school environments. Closely aligned with the NCTM Principles and Standards for School Mathematics, the reader-friendly, interactive format encourages readers to begin developing their own teaching style and making informed decisions about how to approach their future teaching career. A variety of examples establish a broad base of ideas intended to stimulate the formative development of concepts and models that can be employed in the classroom. Readers are encouraged and motivated to become teaching professionals who are lifelong learners. The text offers a wealth of technology-related information and activities; reflective, thought-provoking questions; mathematical challenges; student life-based applications; TAG (tricks-activities-games) sections; and group discussion prompts to stimulate each future teacher's thinking. "Your Turn" sections ask readers to work with middle school students directly in field experience settings. This core text for middle school mathematics methods courses is also appropriate for elementary and secondary mathematics methods courses that address teaching in the middle school grades and as an excellent in-service resource for aspiring or practicing teachers of middle school mathematics as they update their knowledge base. Topics covered in Teaching Middle School Mathematics: \*NCTM Principles for School Mathematics; \*Representation; \*Connections; \*Communication; \*Reasoning and Proof; \*Problem Solving; \*Number and Operations; \*Measurement; \*Data Analysis and Probability; \*Algebra in the Middle School Classroom; and \*Geometry in the Middle School Classroom.
