Tiger Tank David Fletcher 2020-02-18 The German Tiger I was the most feared battle tank of the Second World War. Its invincibility lay in its main 8.8cm gun and heavy defensive armour. Tiger Tank gives a rare insight into acquiring, owning and operating one of these awesome fighting machines, using the UK's Tank Museum's Tiger 131 - the only Tiger I in the world that has been restored to full running order. In addition to offering unique insights into maintenance and driving the Tiger, the book includes vivid personal recollections from wartime German tank crewmen and reveals what it was like to operate this 57-ton giant in combat. It was written by a team of experts from the Tank Museum who were closely involved with the strip-down and rebuild of the Tiger I. David

Riding the Tiger John Seidensticker
1999-02-08 Beauty, grace and power make the tiger one of the world's most loved animals, yet it is precisely these qualities that have been its downfall. Poaching for skins and body parts, loss of habitat and prey and conflicts between people and wild tigers have caused catastrophic declines in tiger numbers throughout their range. If wild tigers are to survive through the next century, we must act now. *Riding the Tiger* is a comprehensive, scientific and eminently readable account of the problems and possible solutions of securing a future for

wild tigers. Lavishly illustrated in full colour, it is written by leading conservationists working throughout Asia. It is a vital information resource for tiger conservationists in the field, necessary reading for serious students of carnivore conservation and conservation biologists in general, and an accessible overview of tiger conservation for general readers.

Panzer III Michael Hayton 2017-02-15
When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-

supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschutz III (StuG III) assault gun, one of the most successful of the war, until the end of the war. Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf

L, modified for tropical service. It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK. The Tank Museum has restored the tank to running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.

Tiger I Bob Carruthers 2014-07-02 The original how-to manual for handling the German tank in World War II, edited and translated by the Emmy Award-winning historian and author. During the Second World War, Tiger tank crews had to be trained as quickly and effectively as possible. To assist in this process General Heinz Guderian authorized the publication of the Tigerfibel, the illustrated manual

which was issued to Tiger I crews from 1943 onwards. This highly unorthodox publication was full of risqué drawings and humorous illustrations and was designed to convey complex battlefield instructions in a simple and memorable manner. This unique primary source has now been translated into English by Emmy Award-winning historian Bob Carruthers and published with a new overview and introduction. It makes for indispensable reading for anyone interested in tank warfare in World War II. The manual contains everything the reader could ever wish to know concerning how the crews were instructed to handle the Tiger I under combat conditions, including detailed instructions on aiming, firing, ammunition and close combat. There are extensive sections on maintenance, driving, radio operation and the essentials of commanding the heavy tank. This priceless information is now being made available to

a wider English-speaking audience as an electronic publication for the first time. Fascinating and highly accessible, the Tigerfibel is essential and rewarding reading for all those interested in the history of this famous tank. This book is part of the Hitler's War Machine series which draws on primary sources and contemporary documents to provide a new insight into the true nature of Hitler's Wehrmacht.

Ride the Tiger Julius Evola 2018-07-13

values he recognizes as his own, and to structure his life in a clear and unambiguous way, no longer exist in the contemporary world. Everything that has come to predominate in the modern world is the direct antithesis of the world of Tradition, in which a society is ruled by principles that transcend the merely human and transitory. Ride the Tiger presents an implacable criticism of the idols, structures, theories, and illusions of our dissolute age

examined in the light of the inner teachings of indestructible Tradition. Evola identifies the type of human capable of “riding the tiger,” who may transform destructive processes into inner liberation. He offers hope for those who wish to reembrace Traditionalism.
